SUMMARY

Data Scientist and AI/ML engineer with 1.5+ years of experience shipping LLM agents, RAG systems, knowledge graphs and deep learning models to production with Python, FastAPI, Docker and AWS. Built a reinforcement learning topic recommender and a concept classifier for personalised learning. Solid in data structures and algorithms (155+ LeetCode problems in Python).

TECHNICAL SKILLS

Languages and Data: Python, SQL, MongoDB, Pandas, NumPy, knowledge graphs (YAGO), Matplotlib, Seaborn, data structures and algorithms

Generative AI: LLM orchestration, agentic AI, RAG, LangChain, LangGraph, prompt engineering, LLM evaluation, LoRA fine-tuning, FAISS, Pinecone

Machine Learning: Reinforcement learning, deep learning (CNN, RNN, BiLSTM), NLP, PyTorch, TensorFlow, Keras, scikit-learn, feature engineering, model evaluation

Deployment and Tools: FastAPI, Docker, AWS, Git

EXPERIENCE

Hurrey Tech Ventures Private Limited Mar 2025 – Oct 2026

Data Scientist *Sep 2025 – Oct 2026*

- Designed and built LLM orchestration and agentic workflows with LangChain and LangGraph that plan steps, call tools and return a single grounded answer.
- Built production RAG pipelines on FAISS and Pinecone, and evaluated answer quality and hallucination to compare prompt, retrieval and model changes.
- Fine-tuned language models with LoRA for domain-specific tasks.
- Built a YAGO knowledge graph and a deep learning classifier that labels each node as an academic concept or not, enabling personalised recommendations and answers matched to each learner's understanding.
- Shipped models and agents as FastAPI services, containerised with Docker and deployed on AWS.

Data Science Intern *Mar 2025 – Aug 2025*

- Built a reinforcement learning model that recommends the next topics for teachers to teach and students to learn.
- Converted to a full-time Data Scientist role after six months.

Independent Data Science Study Dec 2024 – Feb 2025

- Self-directed study of Python, machine learning, deep learning and NLP, applied in the projects below.

Stockify | B2C Sales, Stocks and IPOs Jul 2024 – Dec 2024

Infinity Learn | B2C Sales, Education Sep 2022 – Feb 2024

Hitachi | Campus placement hire, position ended due to layoffs Oct 2021 – Mar 2022

PROJECTS

Fake News Detection | Python, TF-IDF, BiLSTM, TensorFlow

- Classified news articles as fake or real using TF-IDF features and BiLSTM models.
- Code: github.com/Meenu-12345/Fake-News-Detection

Potato Disease Classification | CNN, TensorFlow, Keras, OpenCV

- Built a convolutional neural network that classifies potato leaf diseases from images.
- Code: github.com/Meenu-12345/Potato-Disease-Classification

EDUCATION

Bachelor of Technology, Computer Science Engineering Sep 2018 – Jul 2022

Shivalik College of Engineering, Dehradun, India

CERTIFICATIONS

Temporal 101 (Temporal); Deep Learning A-Z 2025 (Udemy); Python for Data Science and ML Bootcamp (Udemy)
LeetCode (leetcode.com/u/RachelSingh123): 155+ Python and 50 SQL problems solved, Top SQL 50 badge
